

↑ **“BLEED” LINE:** EXTEND BACKGROUND TO HERE, FOR EDGE-TO-EDGE COLOR ↑

↑ **TRIM LINE:** YOUR FINISHED PRINT WILL BE CUT ALONG HERE ↑

↑ **SAFE LINE:** KEEP IMPORTANT ART INSIDE HERE ↑

Remember:

1. Convert all fonts to outlines.

Fonts that are not converted may be “switched” when opened on a different computer.

2. Only scale pixel-art elements down, never up.

Stretching or expanding pixel art may result in “pixelated” prints. Use bigger pixel-art.

3. Keep text (and other important art) inside the gold line.

Artwork outside the gold line may be trimmed during the production process.

(DELETE THIS LAYER BEFORE UPLOAD!)
